

# WITSP19

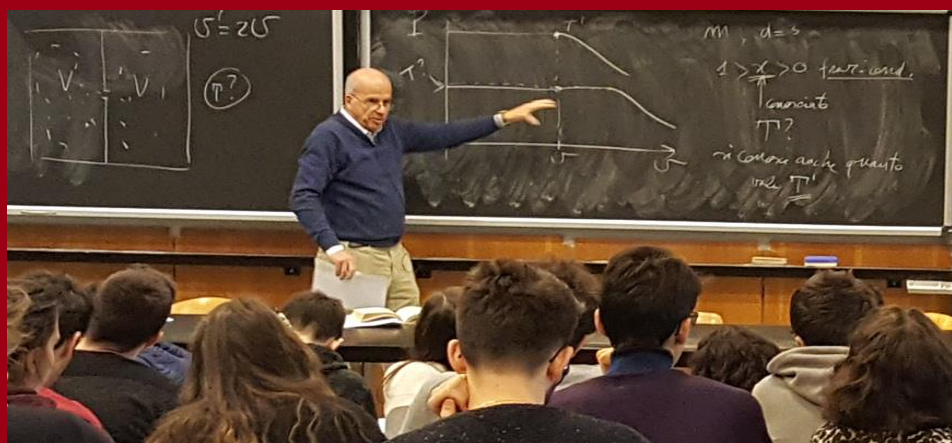

## Workshop on Interdisciplinary Topics in Statistical Physics

*a meeting in honor of Attilio Stella*

Aula "A. Rostagni" – Department of Physics and Astronomy "G. Galilei"  
University of Padova

September 19<sup>th</sup> - 20<sup>th</sup> 2019

*On the occasion of the 70 years of Attilio Stella, we take the opportunity of meeting together to celebrate his international scientific career, spanning developments of almost five decades, from the renormalization group theory of critical phenomena to recent applications of statistical mechanics to interdisciplinary fields.*

### Scientific Program

*Starting from a historical recollection, the workshop aims at considering the current status and perspective of statistical physics. Topics include complex systems, polymers physics, biophysics, econophysics, nonequilibrium statistical mechanics, transport phenomena, disordered systems, and large deviations theory.*

### Organizing Committee:

M. Baiesi, Univ. Padova  
F. Baldovin, Univ. Padova  
E. Carlon, Univ. Leuven  
J.O. Indekeu, Univ. Leuven  
E. Orlandini, Univ. Padova  
F. Seno, Univ. Padova  
C. Vanderzande, Univ. Hasselt

Dipartimento  
di Fisica  
e Astronomia  
Galileo Galilei
